

CRA-W Career Mentoring Workshop Agenda
June 9-10, 2007
FCRC Conference, San Diego, CA

On behalf of the Committee on the Status of Women in Computing Research (CRA-W), the Workshop Committee Chair Annie I. Antón welcomes you to the CRA-W Workshop on Research Career Mentoring for Women in Computer Science and Engineering. The goal of the workshop is to provide mentoring activities targeting women in professional research careers. The workshop is structured to provide researchers at all levels with critical information about the culture of and the content required for professional research and contacts with successful role models and mentors. Participants are invited to choose from one of two tracks: 1) academic researchers and graduate students; and 2) industrial and national laboratory women. There are also several joint sessions giving participants an opportunity to interact and network with women in their field.

The Committee on the Status of Women in Computing Research (CRA-W) is grateful for the financial support from the National Science Foundation for this workshop. These funds were especially important for offering travel grants to participants and panelists. The chairs is also grateful for the invaluable assistance of Carla Romero at the CRA and Kathleen Fisher for serving as our industry liaison.
