Mission and activities

- Strengthen research and education in the computing fields
 - Working to influence **policy** that impacts computing research
 - Encouraging the development of **human resources**
- Contributing to the cohesiveness of the professional **community**

Gov't. Affairs

- Collect and disseminate **information** about the importance and state of computing research

Table 1. PhD Production by Type of Department and Rank

Department, Rank	PhDs Produced	Avg. per Dept.	PhDs Next Year	Avg. per Dept.
US CS 1-12	258	26.2	288	26.2
US CS 13-24	215	20.1	241	20.1
US CS 25-36	179	17.1	205	17.1
US CS Other	316	8.4	962	8.4
US CS Total	1,501	10.0	1,696	11.3

Taulbee Survey

What is the CCC?

<http://cra.org/ccc>

What is the CCC?

- Established in 2006 through a multi-year cooperative agreement between the National Science Foundation and CRA
- Provides a voice for the national computing research community
- Facilitates the development of a bold, multi-themed vision for computing research - and communicates this vision to stakeholders

A broad-based Council

Leadership:

- Ed Lazowska, U of Washington (Chair)
- Susan Graham, UC-Berkeley (Vice-Chair)
- Erwin Gianchandani, CRA (Director)

Terms ending 2014:

- Deborah Crawford, Drexel
- Gregory Hager, Johns Hopkins
- John Mitchell, Stanford
- Bob Sproull, Oracle (ret.)
- Josep Torrellas, UIUC

Terms ending 2013:

- Randy Bryant, CMU
- Lance Fortnow, Northwestern
- Eric Horvitz, Microsoft Research
- Hank Korth, Lehigh
- Beth Mynatt, Georgia Tech
- Fred Schneider, Cornell
- Margo Seltzer, Harvard

Terms ending 2012:

- Stephanie Forrest, U of New Mexico
- Chris Johnson, U of Utah
- Anita Jones, U of Virginia
- Frans Kaashoek, MIT
- Ran Libeskind-Hadas, Harvey Mudd
- Robin Murphy, Texas A&M

Rotated off:

- Greg Andrews, U of Arizona (ret.) (2009)
- Bill Feiereisen, Intel (2011)
- Dave Kaeli, Northeastern (2011)
- Dick Karp, UC-Berkeley (2010)
- John King, U of Michigan (2011)
- Peter Lee, Microsoft Research (2009)
- Andrew McCallum, U-Mass (2010)
- Karen Sutherland, Augsburg U (2009)
- Dave Waltz, Columbia (2010)

Meets three times a year, including an annual summer meeting in Washington, DC

A multitude of activities

- **Community-initiated visioning:**
 - Workshops that bring researchers together to discuss “out-of-the-box” ideas
 - Challenges & Visions tracks at conferences
- **Outreach to the White House, Federal funding agencies:**
 - Outputs of visioning activities
 - Short reports to inform policy makers
 - Task Forces -- Health IT, Sustainability IT, and Data Analytics

Visioning: Robotics success

May 21, 2009

A Roadmap for US Robotics From Internet to Robotics

Organized by

- Georgia Institute of Technology
- University of Southern California
- Johns Hopkins University
- University of Pennsylvania
- University of California, Berkeley
- Rensselaer Polytechnic Institute
- University of Massachusetts, Amherst
- University of Utah
- Carnegie Mellon University
- Tech Collaborative

Sponsored by

4 meetings during summer 2008

Roadmap published May 2009

Extensive discussions between visioning leaders & agencies

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

July 21, 2010

THE DIRECTOR

M-10-30

MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

FROM: Peter R. Oszkar, Director, Office of Management and Budget
John P. Holdren, Director, Office of Science and Technology Policy

Science and Technology Priorities for the FY 2012 Budget

Science discovery, technological breakthroughs, and innovation are major engines for expanding the frontiers of human knowledge and are indispensable for promoting sustainable economic growth, improving the health of the population, moving toward a clean energy future, addressing global climate change challenges, managing competing demands on the environment, and safeguarding our national security.

This memorandum follows up on OMB Memorandum M-10-19 by outlining the Administration's science and technology (S&T) priorities for formulating FY 2012 Budget submissions to the Office of Management and Budget (OMB). These priorities for research and development (R&D) investments and other S&T investments build on priorities already reflected in the American Recovery and Reinvestment Act, the FY 2010 and 2011 Budgets, and key Administration policy guidance such as the President's *Strategy for American Innovation*. This memorandum also provides program guidance for S&T activities in Executive Departments and Agencies.

Prioritizing key S&T activities

OSTP issues directive to all agencies to include robotics in FY 12 budgets

Developing the Next Generation of Robots

Posted by Tom Kall and Sridhar Kota on June 24, 2011 at 10:14 AM EDT

... research at Carnegie Mellon University, President Obama is launching the *Advanced Manufacturing Partnership* research initiative that will promote a renaissance of American manufacturing.

One exciting element of the President's Advanced Manufacturing Partnership is the *National Robotics Initiative*. Robots are working for us every day, in countless ways. At home, at work, and on the battlefield, they are increasingly lifting the burdens of tasks that are dull, dirty, or dangerous.

But they could do even more, and that's what the National Robotics Initiative is all about. So today, the National Science Foundation, the National Institutes of Health, NASA, and the United States Department of Agriculture are issuing a joint solicitation that will provide up to \$70 million in research funding for next-generation robotics.

The focus of this initiative is on developing robots that work with or beside people to extend their capabilities, taking advantage of the different strengths of humans and robots. In addition to the technology needed for next-generation robotics, the initiative will support applications such as

National Robotics Initiative is announced

Visioning: Progress to date

Community visioning activities	Participants	Organizations
Networking science & engineering	109	44
Cyber-physical systems	100	47
Robotics	141	79
“Big Data” Computing	81	46
Theoretical computer science	39	26
Global development (ICT4D)	56	37
Learning technologies	55	30
Health information technology	121	102
Cross-layer reliability	121	45
Free & open source software	45	35
Advancing computer architecture	In progress	
Interactive technologies	In progress	
Sustainability & IT	In progress	

“Transition Team” white papers

- Sensed and seized an opportunity to influence Federal science policy through the Presidential transition team
- 19 papers produced in late 2008 & early 2009
 - 30 separate authors
- Many highly influential:
 - Re-envisioning DARPA - Peter Lee, Randy Katz
 - Infrastructure for eScience & eLearning/Unleashing Waves of Innovation - Ed Lazowska, Peter Lee, Chip Elliott, and Lary Smarr
 - Security is Not a Commodity - Stefan Savage, Fred Schneider
 - Synthetic Biology - Drew Endy
 - Big Data Computing - Randy Bryant, Randy Katz, Ed Lazowska
 - The Ocean Observatories Initiative - John Delaney, John Orcutt, Robert Weller
 - Cyber-Physical Systems - Janos Sztipanovits, Jack Stankovic

A multitude of activities

- **Community-initiated visioning:**
 - Workshops that bring researchers together to discuss “out-of-the-box” ideas
 - Challenges & Visions tracks at conferences
- **Outreach to the White House, Federal funding agencies:**
 - Outputs of visioning activities
 - Short reports to inform policy makers
 - Task Forces -- Health IT, Sustainability IT, and Data Analytics

"Improving Brain-Computer Interfaces"

October 17th, 2011 by Erwin Gianchandani | [Edit this entry](#) 0 Comments and 3 Reactions

A *Science Nation* story published today describes a public-private partnership funded in part by the National Science Foundation (NSF) that is attempting to link mind and machine to ultimately improve the living conditions of those with "locked-in syndrome" — a malady in which people with normal cognitive brain activity suffer severe paralysis, often from injuries or an illness such as Lou Gehrig's disease.

From the *Science Nation* article (see a video after the jump):

Next generation: CIFellows Project

- Established in 2009 with NSF/CISE funding
- Provides recent CS Ph.D.s one- to two-year postdoctoral positions
- Goal is to retain new Ph.D.s in research & teaching during difficult economic times
- 60 CIFellows funded in 2009
 - 19 left the program after year 1
 - 39 have now found tenure-track faculty or industrial research positions
- Another 47 CIFellows funded in 2010, 20 in 2011
- A research project in and of itself...

Computing Innovation Fellows Project

Home CRA CCC CISE

The 2009 Computing Innovation Fellows have been selected!

[View the press release with the names of the 2009 Fellows and their Mentors.](#)

Congratulations to everyone who was selected for a CIFellow award!
Thank you for your interest in CIFellows. The response has been tremendous!
[For up-to-the-minute news on the progress of the selection process, check out the forum.](#)

In the light of the response that the CIFellows has received, we have set up a courtesy website where employers can post available positions suitable for new computing PhD's. This site is available at <http://cifellows.org/opportunities>.

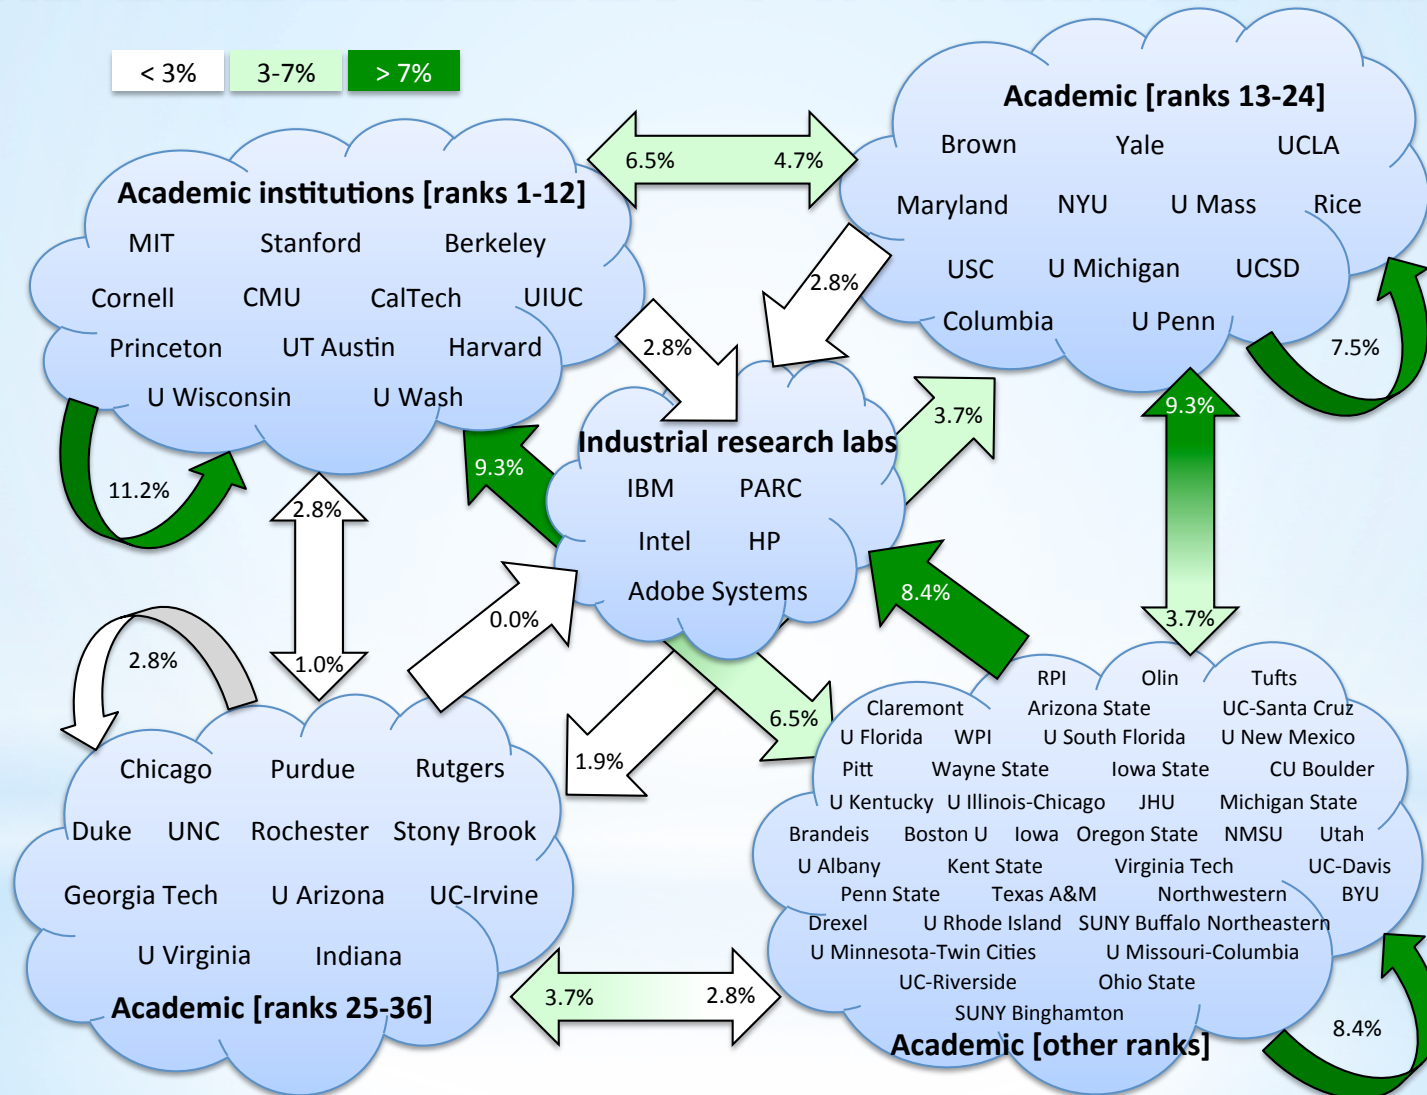

An additional courtesy site has been set up for computing PhD's to post their profiles and availability. This website is available at <http://cifellows.org/profiles>. We encourage employers and candidates to make use of these complimentary services.

The Computing Community Consortium (CCC) and the Computing Research Association (CRA), with funding from the National Science Foundation, announce a program for new PhD graduates to obtain one-to-two year postdoctoral positions

Future directions

<http://cra.org/ccc>

The CS job market is **red** hot

“As the rest of the country fights stubbornly high unemployment, the shortage of qualified engineers has grown acute in the last six months, tech executives and recruiters say, as the flow of personal or venture capital investing has picked up. In Silicon Valley, along the southern portion of the San Francisco Bay in California, and other tech hubs like New York, Seattle and Austin, Tex., start-ups are sprouting by the dozen, competing with well-established companies for the best engineers, programmers and designers. At the same time, all the companies are seeking ever more specialized skills.”

The New York Times

-- *“Silicon Valley Hiring Perks,”*
March 25, 2011

By the numbers perks

- * Extraordinary competition for CS majors right now
- * Starting salaries as high as \$105,000
- * Weekly lessons about entrepreneurship
- * Free meals, haircuts, iPads, shuttle busses, and stock options

The New York Times

<http://cra.org/cc>

Promising signs: Tale of four cities

CMU (applicants)

UW (enrollments)

Stanford (enrollments)

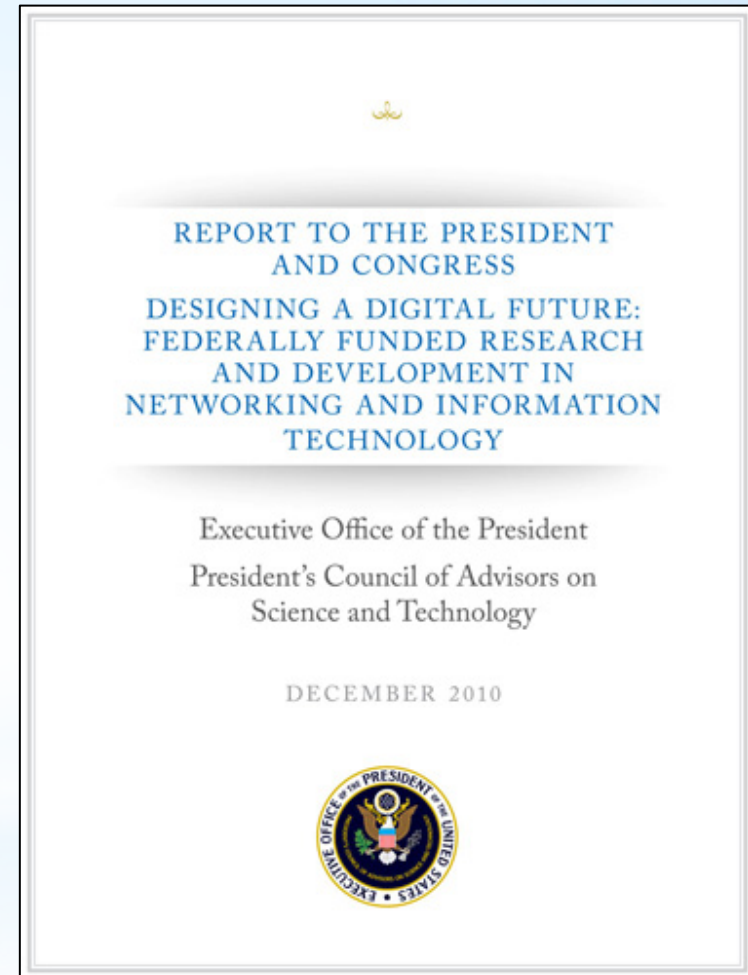

- Previous record in 1999-2000: 762 students
- Bottomed out in 2006-07
- **New record in 2010-11: 1,087**
 - Year-to-year growth of 51%
 - Spring enrollment up 120%

MIT (enrollments)

- **Introductory CS course is single most popular course** (out of 2,000+ MIT courses in a broad range of fields)

A report on the future of the field

- Issued by the President's Council of Advisors on Science and Technology (PCAST)
- About the nationwide Networking & Information Technology R&D (“NITRD”) initiative
- An excellent roadmap for the field
- About a third of PCAST's Working Group was comprised of CCC Council members

The PCAST report

- Health information technology
 - “Go well beyond the current national program to adopt electronic health records”
 - “Make possible comprehensive lifelong multi-source health records for individuals; enable both professionals and the public to obtain and act on health knowledge from diverse and varied sources as part of an interoperable health IT ecosystem; and provide appropriate information, tools, and assistive technologies that empower individuals to take charge of their own health and reduce costs.”

Health IT

- Workshop with 100+ computer scientists, systems engineers, social scientists, care practitioners
- Produced a report summarizing key research questions and directions
- NSF/CISE initiated Smart Health & Wellbeing in FY 2011

- From data to knowledge to action -- enabling evidence-based healthcare
- Empowering people -- providers and consumers -- improves healthcare quality
- Computer-based augmentation of human learning, reasoning, decision-making, and physical motion significantly enhances human capabilities
- Healthcare is a complex, large-scale, adaptive distributed evolving system
- The Importance of Collaborative Government Investment

<http://cra.org/ccc>

The PCAST report II

- Health information technology
 - “Go well beyond the current national program to adopt electronic health records”
 - “Make possible comprehensive lifelong multi-source health records for individuals; enable both professionals and the public to obtain and act on health knowledge from diverse and varied sources as part of an interoperable health IT ecosystem; and provide appropriate information, tools, and assistive technologies that empower individuals to take charge of their own health and reduce costs.”
- Energy and transportation
 - “dynamic power management broadly; interoperable standards for real-time control; low-power systems and devices; and improved surface and air transportation.”

Computational Sustainability

- Workshop with 60+ computer scientists, systems engineers, social scientists, “sustainability scientists”
- Produced a report on key research questions and directions
- NSF has announced 2012 solicitation for SEES initiative

○ Big Data

- Temporal & geographic
- Very large, heterogeneous (graphical structures, sampled measurements, images, extensive text/comments, social network

Special tracks at AAAI, ACM SIGDEV, CHI, ICML, and Pervasive, with CCC “Best Paper” awards

...enance,
...ation,
...alytics, archiving
...icture

- Aggregations of personal data
- Targeting feedback systems
- Quality & transparency of models
- Understanding human needs, encouraging behavior changes

PCAST report III

- Improving health care
 - Enabling the smart grid
 - Revolutionizing transportation
 - Ensuring our national defense
 - Enabling the future of networking
 - Delivering personalized education
 - Empowering the developing world
 - Driving advances in all fields of science & engineering
- } cybersecurity

Key drivers

<http://cra.org/cc>

Key drivers: technology for me

“It’s become glamorous to become the next Mark Zuckerberg, and everyone likes to think they have some great idea.”

--Keila Fong, Yale University undergraduate

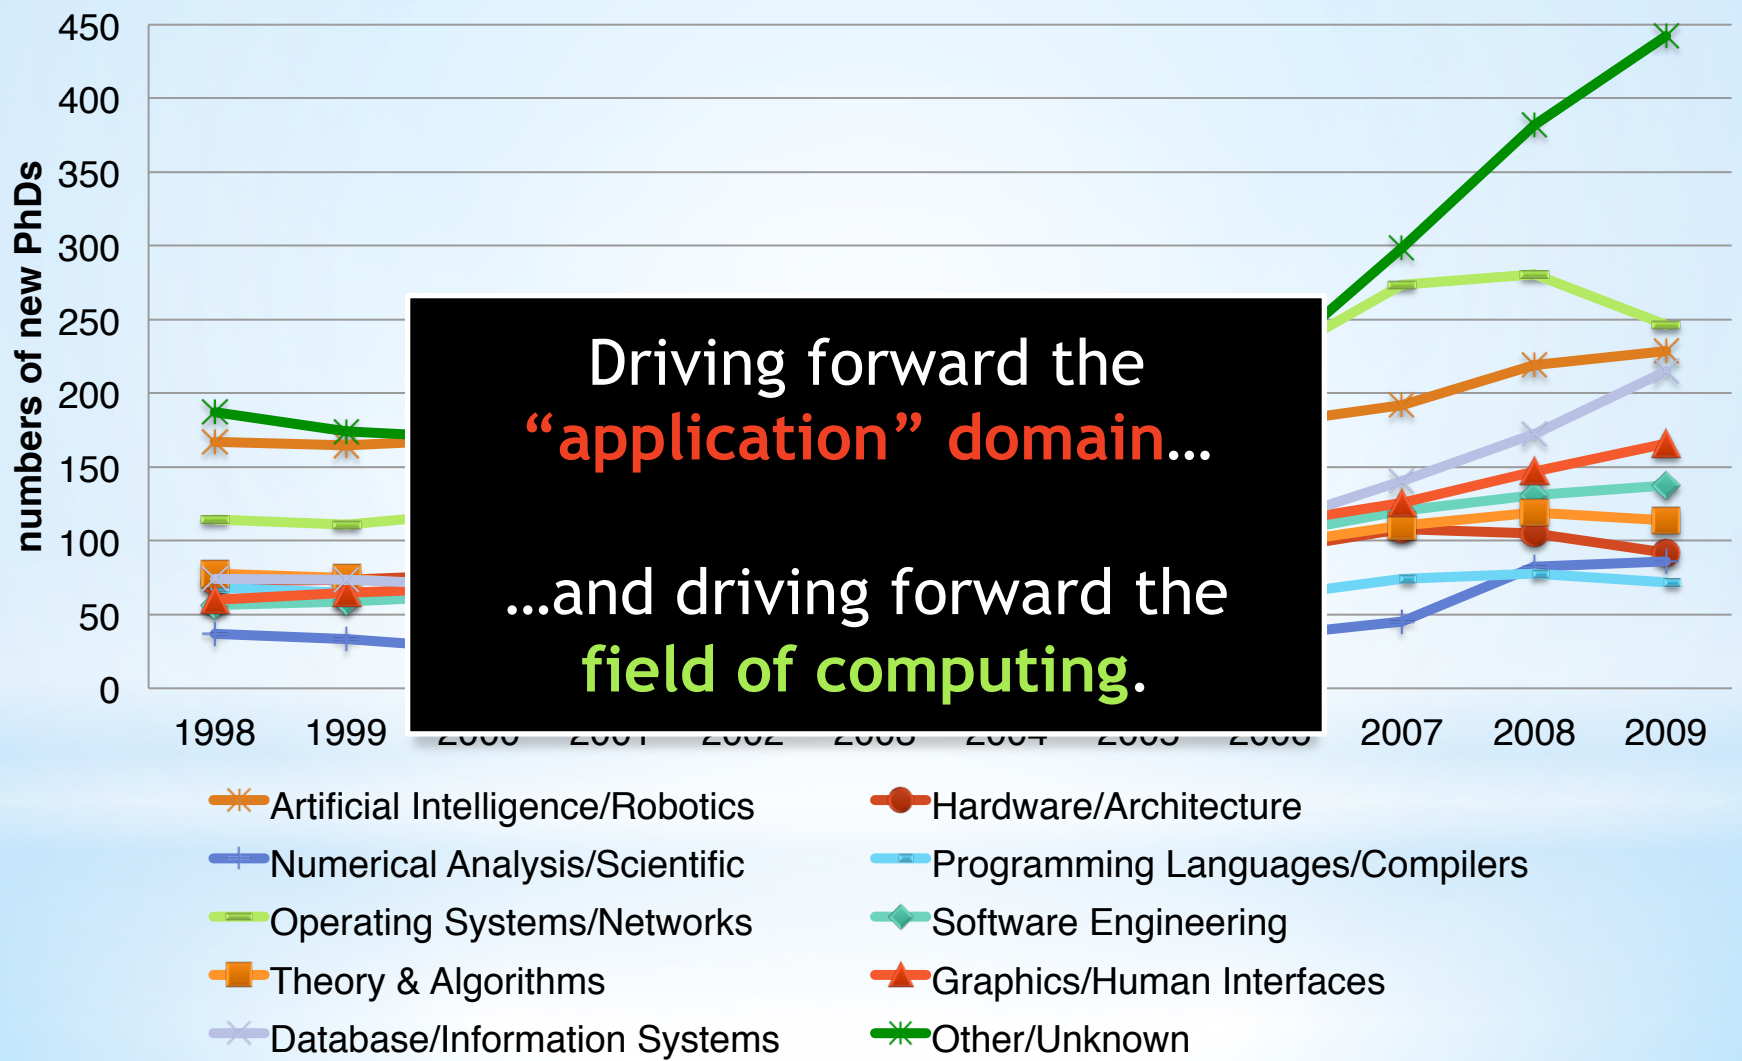

Key drivers: information

- * Just about every field is becoming an information field
- * “NIT is arguably unique among all fields of science and engineering in the breadth of its impact ... Recent technological and societal trends place the further advancement and application of NIT squarely at the center of our Nation’s ability to achieve essentially all of our priorities and to address essentially all of our challenges ... All indicators - all historical data, and all projections - argue that NIT is the dominant factor in America’s science and technology employment.

-- *PCAST report, December 2010*

The shift toward interdisciplinary

A community effort

- Propose visioning activities, white papers, Challenges & Visions tracks at research conferences
- Put together short videos for undergraduates
- Contribute to the CCC Blog
- Send us a research highlight for the Highlight of the Week

The screenshot shows the homepage of the Computing Community Consortium Blog. The main article is titled "Toward an Open mHealth Ecosystem" and is dated April 26th, 2011, by Erwin Gianchandani. The article text discusses the potential of mobile health (mHealth) and the challenges of interoperability. It mentions a group of 45 experts who met to discuss how to bring about an open mHealth ecosystem. The article is accompanied by two small portrait photos of women. The right sidebar contains a search bar, a subscribe form, and a list of recent posts and categories.
