Introduction to Artificial Intelligence

Offered by Professors Sebastian Thrun and Peter Norvig

Oct - Dec 2011. Sign up now at ai-class.org

This course is the online version of Stanford CS211 Introduction to Artificial Intelligence. Students can sign up and take this course for free. All lectures are offered online, and students will have to take the same homework assignments and exams as Stanford students taking CS221 on campus. Anyone taking this course can interact with the instructors online. Plus, students are graded the same way as Stanford students, so you can compare your skills and knowledge to Stanford advanced undergraduate and graduate students. Enroll (for free) and learn about AI from two of the pioneers in the field. The course starts Oct 2, 2011. Sign up now at <http://ai-class.org>.

First, thanks for the work going into the AI course - it's very much appreciated!

Also wanted to thank you for extending the midterm dates; for some of us, that will be a very big help!

I'm completing the course from remote areas of Afghanistan, and often don't have great internet connectivity. Or electricity. Or internet connections that don't block youtube.

I spent the last few days under incoming mortar and rocket attacks, then dodging checkpoints under questionable legal status to exfiltrate a war zone to a third world air field until things settled down.

I had about an hour of fairly solid internet connectivity to be able to get the assignments done, and still managed a respectable score.

This is a typical week here for me.

You're providing a course such that even someone under my exceptional circumstances is able to participate successfully. Great job, and thank you again!
